

Report on EVS Project & VISIT

B.Com & B.A IV Semester

An environment study is all about learning the way we should live and how we can develop sustainable strategies to protect the environment. It helps individuals to develop an understanding of living and physical environment and how to resolve challenging environmental issues affecting nature. Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment. As a result, Students develop a deeper understanding of environmental issues and improve upon the skills to make informed and responsible decision. Environmental science enlightens us on how to conserve our environment in the face of human population growth and anthropogenic activities that degrade natural resources and ecosystems. To understand importance of environment EVS is compulsory subject for 4th Semester. Total (246 from Commerce and 160 from Arts) Students actively participated and submitted EVS project on various interesting topics like Pollution Environmental Study and Human Life, Pollution, Eco System diversity, E-Waste, Green House etc.
